Journal of Quantitative Spectroscopy & Radiative Transfer 66 (2000) III–V

Journal of Quantitative Spectroscopy & Radiative Transfer

www.elsevier.com/locate/jqsrt

List of Contents

NUMBER 1

Ch. Wenger, V. Boudon, J-P. Champion and G. Pierre 1 Highly-spherical Top Data System (HTDS) software for spectrum simulation of octahedral XY_6 molecules

J. Liu, H.M. Shang and Y.S. Chen 17 Development of an unstructured radiation model applicable for two-dimensional planar, axisymmetric, and three-dimensional geometries

Z.N. Begum 35 Significance of multiple scattering in the computation of solar radiation transfer in the atmosphere

Y.-L. Chen, J.W.L. Lewis and C. Parigger 41 Probability distribution of laser-induced breakdown and ignition of ammonia

E.A. Ustinov 55 Weighting functions with separated maxima and kernels of inverse problems for ground-based passive remote sensing

A.S. Pine and T. Gabard 69 Speed-dependent broadening and line mixing in CH_4 perturbed by Ar and N_2 from multispectrum fits

J.-Y. Mandin, V. Dana, L. Régalia, X. Thomas and A. Barbe 93 Nitrogen-broadening in the nitric oxide first overtone band

(Note)

L.P. Giver, C. Chackerian Jr. and P. Varanasi 101 Visible and near-infrared $H_2{}^{16}O$ line intensity corrections for HITRAN-96

NUMBER 2

107 Editorial

J. Ballard, R.J. Knight, D.A. Newnham, J.V. Auwera, M. Herman, G. Di Lonardo, G. Masciarelli, F.M. Nicolaisen, J.A. Beukes, L.K. Christensen, R. McPheat, G. Duxbury, R. Freckleton and K.P. Shine 109 An intercomparison of laboratory measurements of absorption cross-sections and integrated absorption intensities for HCFC-22

0022-4073/00/$ - see front matter © 2000 Published by Elsevier Science Ltd. All rights reserved.

G. Di Lonardo and **G. Masciarelli** 129 Infrared absorption cross-sections and integrated absorption intensities of HFC-125 and HFC-143a

J. Vander Auwera 143 Infrared absorption cross-sections for two substituted ethanes: 1,1-difluoroethane (HFC-152a) and 1,2-dichloroethane

R. McPheat and **G. Duxbury** 153 Infrared absorption cross-sections and integrated absorption intensities of chloroform and fluoroform vapour

E.J. Highwood and **K.P. Shine** 169 Radiative forcing and global warming potentials of 11 halogenated compounds

J.A. Beukes and **F.M. Nicolaisen** 185 Infrared absorption cross-sections and integrated absorption intensities for difluoromethane (HFC-32) and 1,1,1,2-tetrafluoroethane (HFC-134a) in the 650–50 cm^{-1} region

J. Ballard, R.J. Knight and **D.A. Newnham** 199 Infrared absorption cross-sections and integrated absorption intensities of perfluoroethane and cis-perfluorocyclobutane

213 Erratum

214 Erratum

NUMBER 3

G.K. Johri, P. Gupta and **M. Johri** 215 Theoretical study of molecular collisions and microwave linewidth

I.A. Vasil'eva 223 Relations between thermal radiation components of stationary scattering radiator

S.D. Tvorogov, L.I. Nesmelova and **O.B. Rodimova** 243 k-distribution of transmission function and theory of Dirichlet series

K.H. Simmons and **D. Mihalas** 263 A linearized analysis of the modified P_1 equations

G.A. Gonçalves, C.F. Segatto and **M.T. Vilhena** 271 The LTS_N particular solution in a slab for an arbitrary source and large order of quadrature

L. Luizova 277 Abel's inversion applied to array of spectral line profiles

R.A. Toth 285 N_2- and air-broadened linewidths and frequency-shifts of N_2O

M.H. El-Ghazaly, A.M. Abdel-Baky and **M.M. Mansour** 305 Equivalent width of potassium and nickel spectral lines with Voigt profiles using atomic absorption techniques

NUMBER 4

V.P. Kochanov 313 Collision line narrowing and mixing of multiplet spectra

S.S. Yang and **T.H. Song** 327 Error analysis of spectral remote sensing by CO_2 4.3 μm band in various temperature profiles

M.A. Cappelli, Q.E. Walker and P.V. Storm 343 Doppler-free absorption measurements of Stark broadening in a flowing hydrogen plasma

M.E. Wickliffe, J.E. Lawler and G. Nave 363 Atomic transition probabilities for Dy I and Dy II

M.T. Attia 405 An analytical solution of the transport equations for two-medium slab lattice with anisotropic scattering

NUMBER 5

E.P. Zege and L.I. Chaikovskaya 413 Approximate theory of linearly polarized light propagation through a scattering medium

J.-F. Clouet 437 Averaging opacities for radiative transfer problems

A. Goldman, R.R. Gamache, A. Perrin, J.-M. Flaud, C.P. Rinsland and L.S. Rothman 455 HITRAN partition functions and weighted transition-moments squared

E.M. Abulwafa and M.T. Attia 487 Radiative transfer in inhomogeneous solid cylinder with anisotropic scattering using Galerkin method

R.R. Reddy, Y.N. Ahammed, K.R. Gopal, P.A. Azeem and T.V.R. Rao 501 Dissociation energies of astrophysically important MgO, SO, SiN and TiO from spectroscopic data

NUMBER 6

S.K. Barman 509 The solution of the radiative transfer equation for polarized light by the Chandrasekhar's discrete ordinate method

A. Kaşkaş, C. Tezcan and M.Ç. Güleçyüz 519 The solution of the third form transport equation using singular eigenfunctions: the slab and the sphere criticality problems

M.T. Attia 529 On the exact solution of a generalized equation of radiative transfer in a two-region inhomogeneous slab

R. Bennartz and J. Fischer 539 A modified k-distribution approach applied to narrow band water vapour and oxygen absorption estimates in the near infrared

P. Ben Abdallah and V. Le Dez 555 Thermal emission of a two-dimensional rectangular cavity with spatial affine refractive index

B. Blagojević, M.V. Popović, N. Konjević and Z. Pavlović 571 Electron temperature measurements in medium electron density plasmas

T. Viik 581 Radiation field in Rayleigh–Cabannes scattering atmosphere: the nonconservative Milne problem

591 Erratum
